How to Print

For Duplex Printers

Print this as a 2-sided document. You will need a printer that has the ability to duplex print, meaning that it can automatically print on each side in sequential order. This means page one [the cover] will be on the front and page 2 [this page you're reading right now] will be on the back.

For Single-Side Only Printers

Print only odd-numbered pages: 1, 3, 5, 7, etc.

Refeed these originals into your printer blank page cartridge holder with the pages usually facing down and upside down but check your printer to be sure as it varies. And then print the even-numbered pages: 2, 4, 6, 8.

This may take some trial and error and if all else fails, simply print the entire thing and manually face the pages in the right direction and use the blank pages on the back sides for notes.
